

## Basic principle for provided labels:

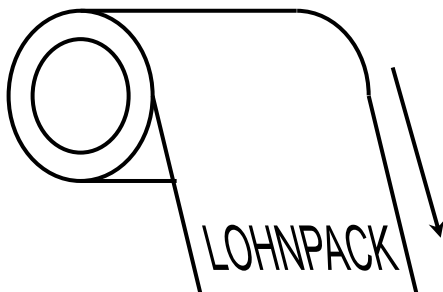

- External winding
- Maximum diameter of reels: 210mm
- Core diameter: 40 mm bzw. 76 mm
- Material: PE

## For the external winding 4 cases are differentiated:

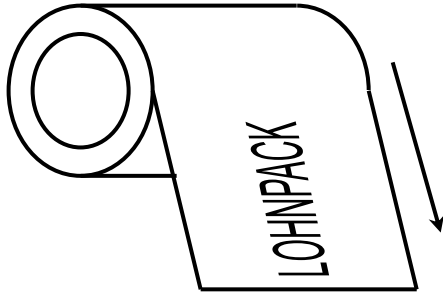

- 1) **Head first: Applies to labels, on which no additions such as batch numbers or the like are added subsequently via thermal transfer printing.**

- 2) **Bottom first: Applies to labels, on which additions such as batch numbers or the like are added subsequently via thermal transfer printing.**

- 3) Beginning of the word on the beginning of the reel: **Applies to labels, on which additions such as batch numbers or the like are added subsequently via thermal transfer printing.**

- 4) Ending of the word on the beginning or the reel: **Applies to labels, on which no additions such as batch numbers or the like are added subsequently via thermal transfer printing.**
