

## MIXPAC™ New Peeler™ 280mL 1:1

You want to use a 2-component cartridge with a 1-component dispenser? An easy to fill and easy to use cartridge? And what if that cartridge is also environmentally friendly and on top even allows you to save money?

MIXPAC™ New Peeler™ 280mL 1:1 is the answer! We are proud to introduce the next generation of 2in1 packaging for adhesive applications.

### 2 in 1 concept

The MIXPAC™ New Peeler™ 2in1 concept combines two materials in an inner and outer tube. In other words a 2-component product packed in a 1-component packaging shape allowing you to use 1-component dispensers. Moreover, it provides the ability of easy front fill or conventional back filling.

### Form follows function

MIXPAC designers and engineers have worked together to meet actual market requirements and customer needs. When it comes to filling the new side-by-side outlet geometry allows for easier and faster front filling while at the same time retaining the option of back filling.

### Applications

With a new and improved design for maximum results, the new MIXPAC™ New Peeler™ is ideal for a wide range of applications in the adhesives industry:

Chemical Anchoring

Structural Bonding

Sealing

Crack Repair

## In detail

**Additional fill volume, less waste**

Due to the simple and smart design, new Peeler has a higher fill volume of 280mL (+30mL) vs comparable cartridges in the market. Furthermore, with a material waste volume less than 5mL the packaging provides economical benefits to fillers and end-users.

**Optimized outlet geometry**

The new design significantly eases front filling, reduces resistance and thus improves efficiency. Moreover, it enhances material dispensing performance for users compared to existing cartridges on the market.

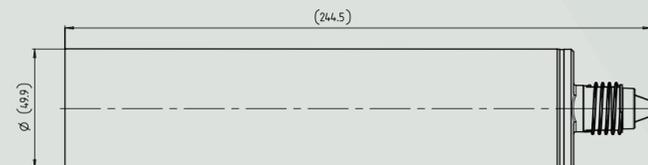

**Larger outlets**

The new easy to fill side-by-side outlets have cross sections designed to enhance material flow, ease the filling process and hence reduce processing time from various angles.

### Cutting technology

The established and advanced design of the cutter unit is further optimized. With now 4 cutting blades it even more accurately peels the inner tube onto the outer tube - which further contributes to improve the performance of the entire system.

### Product specification

Volume: 280mL | Ratio: 1:1  
 Dimensions: 244.5mm x 49.9mm  
 Article number: KQ 280-01-10-01  
 ID: 161771

### Customer benefits at a glance:

- Easy to fill**  
 With larger outlets realized through side-by-side geometry and new decentralized positioning, new Peeler has been designed for easy and faster front filling.
- Easy to apply**  
 With up to 35% less dispensing force versus comparable cartridges available on the market, new Peeler is your perfect dispensing system especially for the usage of manual dispensers.
- Compatible**  
 The advantage of Peeler is clearly its compatibility - no need for additional dispenser or separate plungers as it can be easily used with 1-component dispensers from the existing product range.
- Economical**  
 Due to a 12% higher filling volume combined with 60% less material waste versus other comparable cartridges on the market results in associated costs being reduced.
- Ecological**  
 Through simple and smart design the cartridge packaging waste could be reduced by 15% versus other comparable cartridges available on the market. This results into reduced disposal costs.

# MIXPAC™ New Peeler™ 280mL 1:1

## All-in-one system approach

The new Peeler™ 280mL 1:1 cartridge system is available with a wide range of dedicated mixers and dispensers serving varied adhesive applications in order to ensure superior quality alongside an optimal mixing and metering performance.

### MIXPAC™ mixers

MIXPAC Quadro™ and Helix™ mixers are designed for precise metering and mixing of 2-component construction materials. They are available in various diameters and lengths to meet the requirements of specific applications. Minimal pressure loss and precise metering at high dispensing rates are just a few benefits to be mentioned.

As a full system provider, Sulzer MIXPAC has an extensive range of market-leading dispensers to meet customers' needs.

### COX™ dispensers

are manufactured and assembled at Sulzer Mixpac UK, as well as in the US. The extensive range of 1-component COX dispensers includes high performance manual and battery dispensers being compatible with the MIXPAC Mixpeel cartridge system.

### MK™ dispensers

are well known for quality, reliability and high performance. The MK™ 1-component dispenser range was originally manufactured and supplied by the Danish company called Krøger A/S. Meanwhile, it represents an integral part of the Sulzer Mixpac product portfolio.
